SceneSet
## Helping you set YOUR scene

The SceneSet App from Helvar can be used to control Helvar Imagine Router Systems from your smart device and is free to download from both the Apple App Store and Google Play Store.

Compatible with iOS and Android mobile and tablet devices, the SceneSet app allows the user to simply set various lighting scenes quickly via connection to their Helvar Imagine Router System using WIFI. Once connected, the app opens to a wide range of control features via a customisable user interface, which allows users to modify the look and feel of the app.

Some of the exciting features include the ability to recall and modify scenes across multiple lighting groups, and provides an intuitive interface for controlling RGB colour and tunable white luminaires.

SceneSet is the perfect accompaniment to a Helvar Imagine Router System where control from a mobile device or tablet is required.
